

MARTINAIRE ROUTE DESCRIPTION

MRA 644

UPDATED: 10/05/2022

ROUTE NUMBER/CUSTOMER: 644 / UPS
ROUTE DESCRIPTION: MAF-E38-MAF
DAYS OF OPERATION: MONDAY (AM) THRU FRI (PM)

ROUTE:

LEG:	DAYS:	SCHEDULED TIMES:	PART 135:	PART 91:
MAF-E38	M-FRI	08:12CT ETD 0912CT ETA	<input checked="" type="checkbox"/>	
E38-MAF	M-FRI	18:10CT ETD 1910CT ETA	<input checked="" type="checkbox"/>	

IN POSITION TIME:

AM: 07:12CT

PM: 17:10CT

ROUTE NOTES: MAF-E38: When VFR persists, proceed along V81 until 25 nm southwest of Ft. Stockton VORTAC. Alpine airport Should be visible up through the valley. Cancelling IFR and proceeding VFR to Alpine ensures the Quickest time. In IFR, use caution conducting the NDB approach. You are approaching an airport Within a valley bowl surrounded by peaks on all sides.

Departure: When able, depart VFR and receive clearance in the air. ATC cannot receive transmissions Below 6000' due to mountainous terrain. In IFR, contact FSS for clearance on the ground by phone.

1. To obtain IFR Clearance on the ground at Alpine OR;
2. To close IFR Flight Plan on the ground at Alpine - [call Albuquerque Center](#) at (505) 856-4861

DEICE PROCEDURE: **MAF:** Signature is the vendor for deicing the aircraft. This is expensive. Alternative is to arrange hangar with them if freezing is anticipated. You can also keep a sprayer with 50/50 antifreeze in your car for deice if freezing is light.

E38: Using a sprayer with 50/50 antifreeze is your only option. There is no formal deice program or a Hangar available.

CLEARANCE:

LEG:	ROUTE:	ALTITUDE:
MAF-E38	VECTORS V81 FT. STOCKTON VOR 116.9; V81 VUYUP DIRECT	10000
E38-MAF	DIRECT FT. STOCKTON VOR 116.9; V 81 MIDLAND VOR 114.8 DIRECT	9000

CLEARANCE NOTES:

Be especially alert during taxi in MAF - HOT SPOT 1 - Taxiways P/B and A intersect with Runway 10/28 hold short lines. Be vigilant in this area and careful not to cross the hold short lines to the runway.

SUGGESTED ALTERNATES: MAF – KODO
E38 - KMRF
